Senior Full-Stack Developer & Systems Architect

7+ years building scalable web applications and high-performance systems

Technical Expertise

- **Languages:** TypeScript, JavaScript, Go, Rust, Python, SQL
- **Frontend:** React, Next.js, Svelte/SvelteKit, Vue, Tailwind, GraphQL
- **Backend:** Node.js/NestJS, Go (Gin, Fiber), PostgreSQL, REST/WebSockets
- **Systems:** Multi-tenant, Microservices, Distributed Systems
- **DevOps:** Docker, DigitalOcean/Vultr, CI/CD, Netlify/Railway
- **UI/UX:** Figma, Design Systems, WCAG, Design Tokens, Component Libraries
- **Testing:** Cypress, Jest, Vitest, Golang Testing
- **Methodologies:** Agile, Component-Driven Dev, Tech Debt Reduction

Professional Experience

Freelance Development | Systems Performance Engineer

Sept 2024 - Present

- **Migrated high-traffic Node.js APIs to Golang**, reducing infrastructure costs by **20%** and improving response times by **35%**
- Replaced JSON with URL-encoded data in APIs, reducing payload size by **10-15%** and increasing deserialization speed by **16%**
- Designed **cloud-agnostic deployment architectures** DigitalOcean, Vultr, Fly.io, and Railway, enhancing scalability and reducing vendor lock-in

Structura Biotechnology Inc | Full-Stack Developer

July 2024 - Sept 2024

- Modernized legacy Meteor codebase, achieving **16% faster API response times** through method optimization
- Implemented scalable architecture patterns reducing maintenance overhead by **22%**

Indie Tech | Lead Full-Stack Developer & UI/UX Designer

May 2022 - June 2024

- Spearheaded UI/UX overhaul, resulting in a **43% improvement in user testing scores** and a **27% decrease in UI-related support tickets**
- Engineered **multi-tenant access controls and data segregation**, enhancing security and compliance
- Implemented real-time collaboration features & Approval workflows
- Collaborated to ensure full **SOC 2 compliance**

Kato.Studio | Founder & Lead Developer

Oct 2020 - July 2021

- Elevated client websites to achieve 95+ Lighthouse scores, resulting in an average increase of 53% in organic traffic and a 152% decrease in bounce rates
- Delivered **95+ Lighthouse score** websites with optimized core web vitals, resulting in a 100% client satisfaction rate
- Engineered custom CMS and microservices architecture, improving content management efficiency by an average of 62%
- Created analytics dashboards that **4x client data utilization**, leading to better visibility and data-driven decision-making
- Leveraged emerging industry trends to deliver innovative solutions

Freelance Development | Full-Stack Engineer

Dec 2019 - Oct 2020

- Collaborated with cross-functional teams to integrate design concepts and backend functionality, **reducing project timelines by 27%**
- Contributed to design systems and reusable components, increasing development efficiency by **2x**
- Built a real-time, stream overlay system for a e-sports organization allowing for dynamic content updates & transitions from a web interface

SalesGrowth Development | Frontend Engineer

Dec 2018 - Dec 2019

- Optimized websites achieving **21% better SEO**, **42% higher accessibility**, and **22% faster loads**
- Led comprehensive redesign of the client application, resulting in a **65% increase in user adoption**
- Enhanced usability in existing client applications, leading to a **32% reduction in user-reported issues** and a **28% increase in user satisfaction scores**

Awards & Recognition

🏆 **1st Place -** 2019 McMaster Design League UI/UX Designathon

🛠️ **Systems Architecture -** Designed high-availability deployments across DigitalOcean/Vultr
